AUTOMATIC BAGGING SYSTEMS BY EL_WEIGH

BAGGING SCALE

We have expertised the area of Automatic Bagging Systems by means of our innovative attitude, highly experienced manpower & state of art facilities.

Starting way back in year 2002, we have installed Automatic Bagging systems mainly for Grain & Chemical Industries.

Having sound manufacturing facilities, we are able to deliver you the entire system on turnkey basis.

We provide the Bagging system to match your requirements. These are tailormade to suit your requirements. From 1 Kg small bags to 1000 Kg Big Bags, we have bagging machines for all ranges.

The greatest advantage with us is that you have to deal with only one supplier, who delivers you all the facilities under one roof.

Weighing systems being our core competency, our batch weighing systems always deliver perfect output.

BATCH WEIGHING SYSTEMS

PROCESS AUTOMATION

We have expertised the area of batch weighing systems by means of our innovative attitude, Highly experienced manpower & state of art manufacturing facilities.

Starting way back in 2002, we have installed many Batch weighing systems mainly for Ink, Carbon, Refractories & other industries.

Having sound manufacturing facilities, we are able to deliver you the entire system on turnkey basis.

We have recently completed Installation of batch Weighing Systems for Miraj Dry Mix, Saunsar (M.P.) & Bombay Wellprint Inks Pvt. Ltd.

In both cases we have developed complete system for taking required raw material from storage Tanks as prescribed in the recipe, Heating, Mixing, Blending of the material, Producing final output (Finished Product) & packing

The greatest advantage with us is that you have to deal with only one supplier, who delivers you all the facilities under one roof. Weighing systems being our core competency, our batch weighing systems always deliver perfect output.

BULK WEIGHING SYSTEMS BY EL_WEIGH

PROCESS AUTOMATION

We have expertised the area of Bulk Weighing systems by means of our innovative attitude, highly experienced manpower & state of art facilities.

Starting way back in year 2002, we have installed bulk weighing systems mainly for Grain Industries.

Having sound manufacturing facilities, we are able to deliver you the entire system on turnkey basis.

These Bulk Weighing Systems are available in various ranges starting from 100 KGPH to 2000 TPH.

The greatest advantage with us is that you have to deal with only one supplier, who delivers you all the facilities under one roof.

Weighing systems being our core competency, our batch weighing systems always deliver perfect output.

HOPPER WEIGHING SYSTEMS

PROCESS AUTOMATION

We deliver a complete solution on turnkey basis for Hopper Weighing Systems, along with Insulations, Piping, Pump Houses, Heating, Temperature & flow control requirements etc. on turnkey basis.

We have installed many Hopper weighing systems for number of industries.

Having sound manufacturing facilities, we are able to deliver you the entire system on turnkey basis.

May it be Civil work, Mechanical work, Fabrication, Erection, Piping, Insulation, Pump House, Electrical Control Panels, PLC Panels, Design, VFD's, Software Developments... We have expert team for all the works under one roof.

The greatest advantage with us is that you have to deal with only one supplier, who delivers you all the facilities under one roof.

Weighing systems being our core competency, our batch weighing systems always deliver perfect output.

From 1 Kg upto 1000 MT.. we have a system for you

MANLESS WEIGH BRIDGES

WEIGH BRIDGE AUTOMATION

Relying on the conventional manned Weigh Bridges is a matter of past.

In order to have full proof Weighment of your valuable factory Input & output materials you need to automate & have a system having no manual intervention. We have developed value added Manless Weighing Solutions for

Our clients based on RF ID Technology. RFID tag is mounted on the wind screen of the truck. There are Automatic Boom Barriers all across the plant. The Truck is allowed to move only to the designated areas. At Weigh Bridge weighment is done automatically & the data is updated to the SAP.

All required accessories like Boom Barriers, Traffic Signals, RF ID Cards, Control Panels, RF ID Readers are manufactured inhouse.

We supply Weigh bridges in all capacities & sizes. We are having number of Weigh Bridge Installations throughout the country.
Capacity: 5 MT to 300 MT
